STOCK & SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to facilitate the introduction of sanitary improvements into the dwellings of the working classes, by the adoption of such an arrangement of closet as will enable the "soil-pan to remain constantly supplied with a sufficient quantity of water service to be made available for the removal of the refuse, by preventing the continuous waste of water in consequence of the imperfection, or utter neglect of the ball-valve, so commonly found in connection with the ordinary water-closet apparatus, to obtain an adequate supply of water in cisternage, without the possibility of its being wasted by stopping the valve, weighting the handle, or by other means. It is so constructed that, so long as the cistern contains water, a sufficient supply cannot enter the service-box from the main. Drawings and Specifications may be obtained from STOCK and SON, Waterworks and Plumbers' Brass-work, Sanitary Closets, Rotary Screw-down Taps, Fire Plugs, Cisterns, and Church Furniture in iron and brass, Temple-street, Wolverhampton.
